

Marine Calibration Case 2

Your on board calibration solution

The Marine Calibration Case makes it easy to test and calibrate equipment, enabling your vessels to always meet the requirements of the SOLAS (Safety of Life At Sea) ISM regulation.

The Calibration Case is available in different sizes to better cater to the specific need of your vessel. The instruments are supplied in rugged cases to easily store and protect the gear. A user manual and a variety of necessary fittings are included to carry out on board tests and calibrations.

Certificates

The instruments are supplied with calibration certificate.

Digital Pressure Calibrator

The digital pressure calibrator ADT 672 is used to conduct checks on various instruments on board a vessel and it has the following features:

- Pressure indication
- Option to carry out switch test
- mA, V measurement
- Built in 24VDC power supply and HART communication

Possibility to choose other pressure indicators: DPI 104 or PM 205.

Pneumatic Pressure Pump

The pump handles a pneumatic pressure 95% vacuum to 60 barg.
