

Marine Calibration Case 4

Your on board calibration solution

The Marine Calibration Case makes it easy to test and calibrate equipment, enabling your vessels to always meet the requirements of the SOLAS (Safety of Life At Sea) ISM regulation.

The Calibration Case is available in different sizes to better cater to the specific need of your vessel. The instruments are supplied in rugged cases to easily store and protect the gear. A user manual and a variety of necessary fittings are included to carry out on board tests and calibrations.

Certificates

The instruments are supplied with calibration certificate.

Hydraulic Pressure Calibrator

The calibrator handles a hydraulic pressure 0 to 700 bar g. It is EEx/IS approved for hazardous areas.
