# General Specifications

### GS 01C25F05-01EN

EJX610A and EJX630A Absolute and Gauge Pressure Transmitter

DP harp **EJ**X

The high performance gauge pressure transmitter EJX630A and absolute pressure transmitter EJX610A feature single crystal silicon resonant sensor and are suitable to measure liquid, gas, or steam pressure.

EJX610A and EJX630A output a 4 to 20 mA DC signal corresponding to the measured pressure. They also feature quick response, remote setup and monitoring via BRAIN or HART communications, diagnostics, and optional status output for pressure high/low alarm. The multi-sensing technology provides the advanced diagnostic function to detect such abnormalities as an impulse line blockage or heat trace breakage.

FOUNDATION Fieldbus and PROFIBUS PA protocol types are also available.

All EJX series models in their standard configuration, with the exception of the Fieldbus and PROFIBUS types, are certified as complying with SIL 2 for safety requirement.

### STANDARD SPECIFICATIONS

Refer to GS 01C25T02-01EN for Fieldbus communication type and GS 01C25T04-01EN for PROFIBUS PA communication type for the items marked with " $\Diamond$ ."

#### □ SPAN AND RANGE LIMITS

# (For EJX610A, values are in absolute pressure and lower range limits are 0.)

	asurement an/Range	MPa	psi (/D1)	bar (/D3)	kgf/cm <sup>2</sup> (/D4)
	Span	2 to 200 kPa	0.3 to 29	0.02 to 2	0.02 to 2
A	Range	−100 to 200 kPa	−14.5 to 29	-1 to 2	-1 to 2
	Span	0.01 to 2	1.5 to 290	0.1 to 20	0.1 to 20
В	Range	-0.1 to 2	−14.5 to 290	-1 to 20	-1 to 20
	Span	0.05 to 10	7.3 to 1450	0.5 to 100	0.5 to 100
С	Range	-0.1 to 10	−14.5 to 1450	-1 to 100	-1 to 100
D	Span	0.35 to 70	50.8 to 10150	3.5 to 700	3.5 to 700
	Range	-0.1 to 70	−14.5 to 10150	-1 to 700	-1 to 700

#### PERFORMANCE SPECIFICATIONS

Zero-based calibrated span, linear output, wetted parts material code 'S' and silicone oil, unless otherwise mentioned.

For Fieldbus and PROFIBUS PA communication types, use calibrated range instead of span in the following specifications.

#### **Specification Conformance**

EJX series ensures specification conformance to at least  $\pm 3\sigma$ .

#### **Reference Accuracy of Calibrated Span**

(includes the effects of terminal-based linearity, hysteresis, and repeatability)

Measurement span		Α
Reference	Span≥X	±0.04% of Span
accuracy	Span <x< td=""><td>±(0.02+0.007 URL/span)% of Span</td></x<>	±(0.02+0.007 URL/span)% of Span
Х		70 kPa (10.2 psi)
UR (upper ran	_	200 kPa (29 psi)

Measurement span		В	С	D		
Reference	Span≥X	±0.04% of Span				
accuracy	Span <x< td=""><td>±(0.005+0.00</td><td colspan="2">% of Span</td></x<>	±(0.005+0.00	% of Span			
x	Х		1 MPa (145 psi)	7 MPa (1015 psi)		
URL (upper range limit)		2 MPa (290 psi)	10 MPa (1450 psi)	70 MPa (10150 psi)		

#### [EJX630A with /HAC]

Measurement span		А	
Reference	Span≥X	±0.025% of Span	
accuracy	Span <x< td=""><td>±(0.008+0.006 URL/span)% of Span</td></x<>	±(0.008+0.006 URL/span)% of Span	

Measurement span		B C		D
Reference	Span≥X	±0.025% of Span		
accuracy	Span <x< td=""><td colspan="3">±(0.005+0.002 URL/span)% of Span</td></x<>	±(0.005+0.002 URL/span)% of Span		

#### Ambient Temperature Effects per 28°C (50°F) Change

A capsule: ±(0.04% of Span + 0.075% of URL) B capsule: ±(0.04% of Span + 0.018% of URL) C and D capsule: ±(0.04% of Span + 0.009% of URL)

#### Stability (All normal operating condition) EJX630A: ±0.1% of URL for 15 years EJX610A: ±0.2% of URL for 15 years

#### **Power Supply Effects**

±0.005 % per Volt (from 21.6 to 32 V DC, 350Ω)

#### Vibration Effects

Amplifier housing code 1 and 3: Less than 0.1% of URL when tested per the requirements of IEC60770-1 field or pipeline with high vibration level (10-60 Hz, 0.21 mm displacement/60-2000 Hz 3 g) <u>Amplifier housing code 2:</u> Less than ±0.1% of URL when tested per the requirements of IEC60770-1 field with general application or pipeline with low vibration level (10-60 Hz 0.15mm displacement /60-500 Hz 2g)

#### **Mounting Position Effects**

Rotation in diaphragm plane has no effect. Tilting up to 90 degree will cause zero shift up to 0.21 kPa (0.84 inH<sub>2</sub>O) which can be corrected by the zero adjustment.

#### Response Time (All capsules) "0"

90 ms

When software damping is set to zero and including dead time of 45 ms (nominal)

#### FUNCTIONAL SPECIFICATIONS

#### Output

Two wire 4 to 20 mA DC output with digital communications, linear or square root programmable. BRAIN or HART FSK protocol are superimposed on the 4 to 20 mA signal.

Output range: 3.6 mA to 21.6 mA

Output limits conforming to NAMUR NE43 can be pre-set by option code C2 or C3.

#### Failure Alarm (Output signal code D, E and J)

Output status at CPU failure and hardware error; Up-scale: 110%, 21.6 mA DC or more (standard) Down-scale: -5%, 3.2 mA DC or less Analog output status at process abnormality (Option code /DG6):

The result of process abnormality detected by the advanced diagnostic function can be reflected to an analog alert status. The following three setting modes are available.

		Mode			
	Burnout		Fall back	Off	
Standa	rd	110%, 21.6mA or more	Holds to a		
	/C1	-2.5%, 3.6mA or less	specified value within the	Normal autout	
Option Code	/C2	-1.25%, 3.8mA or less	output range from 3.6mA to	Normal output	
	/C3	103.1%, 20.5mA or more	21.6mA		

#### Damping Time Constant (1st order)

Amplifier's damping time constant is adjustable from 0.00 to 100.00 s by software and added to response time.

Note: For BRAIN protocol type, when the software damping is set to less than 0.5 s, communication may occasionally be unavailble during the operation, especially while output changes dynamically. The default setting of damping ensures stable communication.

#### Update Period "0"

Pressure: 45 ms

#### Zero Adjustment Limits

Zero can be fully elevated or suppressed, within the lower and upper range limits of the capsule.

#### **External Zero Adjustment**

External zero is continuously adjustable with 0.01% incremental resolution of span. Re-range can be done locally using the digital indicator with rangesetting switch.

#### Integral Indicator (LCD display, optional) "0"

5-digit numerical display, 6-digit unit display and bar graph.

The indicator is configurable to display one or up to three of the following variables periodically; pressure in %, scaled pressure, measured pressure. See also "Factory Settings."

# Local Parameter Setting (Output signal code D, E, and J)

Parameter configuration by the external zero adjustment screw and push button (Integral indicator code E) offers easy and quick setup for parameters of Loop test, Tag number, Unit, LRV, URV, Damping, Output mode (linear/square root), Display out 1, and Re-range by applying actual pressure (LRV/URV) and Device Information.

#### **Burst Pressure**

A, B and C capsule: 50 MPa D capsule: 182 MPa

#### Self Diagnostics

CPU failure, hardware failure, configuration error, process alarm for pressure or capsule temperature. User-configurable process high/low alarm for pressure is also available, and its status can be output when optional status output is specified.

#### Advanced Diagnostics (optional) "0"

- Applicable for Output signal code E, J and F.
- Impulse line blockage detection The impulse line condition can be calculated and detected by extracting the fluctuation component from the static pressure signal.
- Heat trace monitoring The change of the process connection temperature calculated by using the two temperature sensors built in the EJX enables to detect the heat trace breakage or the abnormal temperature due to the failure.
- Signal Characterizer (Output signal code D, E and J)

User-configurable 10-segment signal characterizer for 4 to 20 mA output.

Status Output (optional, output signal code D, E and J)

One transistor contact output (sink type) to output the status of user configurable high/low alarm for pressure.

Rating: 30 V DC, 120 mA DC max.

Note: A check meter cannot be connected when status output option (/AL) is specified. Refer to 'Wiring Example for Analog Output and Status Output.'

#### **SIL Certification**

EJX series transmitters except Fieldbus and PROFIBUS PA communication types are certified in compliance with the following standards; IEC 61508: 2010;

Functional Safety of Electrical/electronic/ programmable electronic related systems; SIL 2 capability for single transmitter use, SIL 3 capability for dual transmitter use.

Reliability Data different depending on hardware and software revision.

For details, refer to Functional Safety Data Sheet. (Document number: TI 01C25A05-01EN or TI

01C25A05-21EN for option code SLT )

The document can be downloaded from the website of Yokogawa.

(Website address: https://www.yokogawa.com/ solutions/products-platforms/field-instruments/)

#### NORMAL OPERATING CONDITION (Selected features may affect limits.)

#### **Ambient Temperature Limits**

-40 to 85°C (-40 to 185°F) -30 to 80°C (-22 to 176°F) with LCD display

Process Temperature Limits -40 to 120°C (-40 to 248°F)

#### Ambient Humidity Limits 0 to 100% RH

#### Maximum Over Pressure

Values are in absolute pressure for EJX610A.

	Capsule Pressure		
	А	4 MPa (580 psi)	
	В	16 MPa (2300 psi)	
	С	25 MPa (3600 psi)	
	D	105 MPa (15200 psi)	
-			

# Working Pressure Limits (Silicone oil)

Maximum Pressure Limits

Values are in absolute pressure for EJX610A.

Capsule	Pressure
А	200 kPa (29 psi)
В	2 MPa (290 psi)
С	10 MPa (1450 psi)
D	70 MPa (10150 psi)

# Minimum Pressure Limit

See graph below

Figure 1-2. Working Pressure and Process Temperature [For EJX630A]

#### Supply & Load Requirements

(Output signal code D, E and J. Optional features or approval codes may affect electrical requirements.)

With 24 V DC supply, up to a  $550\Omega$  load can be used. See graph below.

#### Figure 2. Relationship Between Power Supply Voltage and External Load Resistance

#### Supply Voltage "0"

- 10.5 to 42 V DC for general use and flameproof type.
  10.5 to 32 V DC for lightning protector (option code A).
- 10.5 to 30 V DC for intrinsically safe, type n, nonincendive or non-sparking type.
- Minimum voltage limited at 16.6 V DC for digital communications, BRAIN and HART

#### Load (Output signal code D, E and J) 0 to 1290Ω for operation

 $250 \text{ to } 600\Omega$  for digital communication

#### Communication Requirements "0"

(Approval codes may affect electrical requirements.) **BRAIN** 

#### **Communication distance**

Up to 2 km (1.25 miles) when using CEV polyethylene-insulated PVC-sheathed cables. Communication distance varies depending on type of cable used.

#### Load capacitance

0.22 µF or less

Load inductance 3.3 mH or less

Input impedance of communicating device 10 k $\Omega$  or more at 2.4 kHz.

#### **EMC Conformity Standards**

EN 61326-1 Class A, Table2 EN 61326-2-3 EN 61326-2-5 (for fieldbus)

### **European Pressure Equipment Directive**

**2014/68/EU** Sound Engineering Practice (for all capsules)

#### With option code /PE3 (for D capsule)

Category III, Module H, Type of Equipment: Pressure Accessory-Vessel, Type of Fluid: Liquid and Gas, Group of Fluid: 1 and 2

#### EU RoHS Directive EN IEC 63000

EN IEC 03000

#### Safety Requirement Standards EN 61010-1, C22.2 No.61010-1

- Installation category: I (Anticipated transient overvoltage 330 V)
- Pollution degree: 2
- Indoor/Outdoor use

#### PHYSICAL SPECIFICATIONS

#### Wetted Parts Materials

Diaphragm, process connector Refer to "MODEL AND SUFFIX CODES."

#### **Non-wetted Parts Materials**

#### Housing

- Low copper cast aluminum alloy
- Low copper cast aluminum alloy with corrosion resistance properties (copper content ≤ 0.03%, iron content ≤ 0.15%) (optional)
- ASTM CF-8M Stainless steel (optional)

#### Coating of housing

[for aluminum housing] Polyester resin powder coating Mint-green paint (Munsell 5.6BG 3.3/2.9 or its equivalent) [for option code /P□ or /X2] Epoxy and polyurethane resin solvent coating

# Degrees of protection IP66/IP67, Type 4X

Pipe

Polypropylene

Cover O-rings

Buna-N, fluoro-rubber (optional)

# Name plate and tag 316 SST

Fill fluid

Silicone, Fluorinated oil (optional)

#### Weight

Capsule A, B and C: 1.2 kg (2.6 lb)\*

Capsule D: 1.4 kg (3.1 lb)\* \*: Without integral indicator and mounting bracket.

Add 1.5 kg (3.3 lb) for Amplifier housing code 2.

#### Connections

Refer to "MODEL AND SUFFIX CODES."

Optional Codes			□/ Optional specification			

The "▶" marks indicates the most typical selection for each specification. Example: EJX630A-DAS4N-012NN/□.

\*1: Hastelloy C-276 or ASTM N10276.

\*2: A Users must consider the characteristics of selected wetted parts material and the influence of process fluids. The use of inappropriate materials can result in the leakage of corrosive process fluids and cause injury to personnel and/or damage to plant facilities. It is also possible that the diaphragm itself can be damaged and that material from the broken diaphragm and the fill fluid can contaminate the user's process fluids. Be very careful with highly corrosive process fluids such as hydrochloric acid, sulfuric acid, hydrogen sulfide, sodium

hypochlorite, and high-temperature steam (150°C [302°F] or above). Contact Yokogawa for detailed information of the wetted parts material.

\*3: Not applicable for combination of capsule code D and wetted parts material code H. Threads are based on the withdrawn DIN 16 288.

- \*4: Not applicable for electrical connection code 0, 5, 7, 9 and A.
- \*5: Not applicable for electrical connection code 0, 5, 7 or 9.
- \*6: Material of a blind plug; aluminum alloy for code 5 and 9, and SUS304 for code 7.
- \*7: Not applicable for output signal code G
- \*8: Not applicable for output signal code F.
- \*9: Intergranular corrosion test passed according to ASTM A262 Practice E.

The '#marks indicate the construction materials conform to NACE material recommendations per MR0175/ISO 15156. Please refer to the latest standards for details. Selected materials also conform to NACE MR0103.

# ■ OPTIONAL SPECIFICATIONS (For Explosion Protected type) "◊"

For other agency approvals and marine approvals, please refer to GS 01C25A20-01EN.

Please select appropriate equipment in accordance with the laws and regulations of the relevant country/region, when it is used in a location where explosive atmospheres may be present.

- \*1: \*2:
- Not applicable with color change option. Not applicable for amplifier housing code 2. Check/External indicator terminals cannot be used when this option code is specified. Not applicable for output signal code F and G.
- \*3: The unit of MWP (Max. working pressure) on the name plate of a housing is the same unit as specified by option codes D1, D3, and D4.
- Applicable for output signal codes D, E and J. The hardware error indicates faulty amplifier or capsule. Also see 'Ordering Information'. Material traceability certification, per EN 10204 3.1 B.
- \*4: \*5: \*6: \*7:
- Applicable for capsule code A.
- Applicable for capsule code B.
- Applicable for capsule code C
- \*8: \*9: \*10: \*11: \*12:
- \*13: \*14:
- Applicable for capsule code C. Applicable for capsule code D. Dry nitrogen gas or pure water is used for oil-prohibited use (option codes K1 and K2). The unit on the certificate is always kPa/MPa regardless of selection of option code D1, D3 and D4. Not applicable for amplifier housing code 2 and 3. Applicable for measurement span code D. If compliance with category III is needed, specify this option code. 316 or 316L SST. The specification is included in amplifier code 2.
- \*15:
- \*16: \*17:
- \*18: \*19:
- Applicable only for output signal code E and J. The change of pressure fluctuation is monitored and then detects the impulse line blockage. See TI 01C25A31-01E for detailed technical information required for using this function. Applicable for wetted parts material code S. Refer to "PERFORMANCE SPECIFICATIONS". Applicable only for EJX630A. Not applicable for the combination of measurement span code A and wetted parts material code H. Not applicable for option or de X/2 or 4. When the the terms when include a contribution of the computer the decomposite of the terms when include a contribution of the computer the terms when include a contribution of the computer terms when include a contribution of the computer terms when the terms when include a contribution of the computer terms when include a contribution of the computer terms when the terms when include a contribution of the computer terms when the terms when terms when the terms when the terms when the terms when the terms when terms when the terms when terms whent terms when terms when terms when terms when t code K2, K3 or A1. When specified range values include negative value for A capsule, the accuracy shall be the standard accuracy even if high accuracy option (HAC) is specified.
- \*20: Not applicable for EJX610A.
- \*21: \*22: Not applicable for output signal code F, G, P and S.
- Applicable only for output signal code D, E and J.

#### DIMENSIONS

#### Model EJX610A and EJX630A

• With process connections code 7

\*1: Only for EJX630A whose measurement span code is A, B, or C.

\*2: 58 mm(2.28 inch) for measurement span code D.

\*3: 11 mm(0.43 inch) for measurement span code D.

\*4: When electrical connection code 7 or C is selected, a blind plug is protruded upto 8 mm (0.31 inch) from the conduit connection.

#### • With Process connections code 4

• With Process connections code 8 and 9

F04E.ai

Unit: mm (approx.inch)

• Terminal Configuration

### • Terminal Wiring

SUPPLY	+	$\begin{bmatrix} 1\\ 2 \end{bmatrix}$ Power supply and output terminals		
CHECK or	+ - +	3 External indicator (ammeter) terminals <sup>*4*5</sup> or 3 Status contact output terminals <sup>*5</sup>		
ALARM		③       Status contact output terminals*5         ②       (when /AL is specified)		

\*4: When using an external indicator or check meter, the internal resistance must be 10  $\Omega$  or less. A check meter or indicator cannot be connected when /AL option is specified.

\*5: Not available for FOUNDATION Fieldbus and PROFIBUS PA communication types.

#### • Wiring Example for Analog Output and Status Output

#### < Ordering Information > "0"

Specify the following when ordering

For output signal code –J, refer to GS 01C25T01-01EN.

- 1. Model, suffix codes, and option codes
- 2. Calibration range and units
  - Calibration range can be specified with range value specifications up to 5 digits (excluding any decimal point) for low or high range limits within the range of -32000 to 32000. When reverse range is designated, specify Lower Range Value (LRV) as greater than Upper Range Value (URV). When specified range value includes minus value for A capsule, the accuracy shall be the standard accuracy even if high accuracy option (/HAC) is specified.
  - 2) Specify only one unit from the table, 'Factory Settings' when shipped.'
- 3. Display scale and units (for transmitters equipped with integral indicator only) Specify either 0 to 100 % or engineering unit scale and 'Range and Unit' for engineering units scale: Scale range can be specified with range limit specifications up to 5 digits (excluding any decimal point) for low or high range limits within the range of -32000 to 32000. The unit display consists of 6-digit, therefore, if the specified unit is longer than 7 characters excluding '/', the first 6 characters will be displayed on the unit display.
- Tag Number (if required) Specified characters (up to 16 characters for BRAIN, 22 characters for HART, or 16 characters for /N4 tag) are engraved on the stainless steel tag plate fixed on the housing.
- SOFTWARE TAG (for HART only. If required) Specified characters (up to 32 characters) are set as "Tag" (the first 8 characters) and "Long tag"<sup>\*1</sup> (32 characters) in the amplifier memory. Use alphanumeric capital letters. When the "SOFTWARE TAG" is not specified, specified "TAG NO" is set as "Tag" (the first 8 characters) and "Long tag"<sup>\*1</sup> (22 characters) in the amplifier memory. \*1: applicable only when HART 7 is selected.
- Other factory configurations (if required) Specifying option code CA or CB will allow further configuration at factory. Following are configurable items and setting range.
  - [/CA : For HART communication type]
  - 1) Descriptor (up to 16 characters)
  - 2) Message (up to 30 characters)
  - 3) Software damping in second (0.00 to 100.00)
  - [/CB : For BRAIN communication type]
  - 1) Software damping in second (0.00 to 100.00)

#### <Information on EU WEEE Directive>

EU WEEE (Waste Electrical and Electronic Equipment) Directive is only valid in the EU.

This instrument is intended to be sold and used only as a part of equipment which is excluded from WEEE Directive, such as large-scale stationary industrial tools, a large-scale fixed installation and so on, and, therefore, subjected to the exclusion from the scope of the WEEE Directive. The instrument should be disposed of in accordance with local and national legislation/regulations.
