Special characteristics

- ▶ pressure port G 3/4" flush for pasty and impurity media
- ▶ pressure port PVDF for aggressive media

Optional versions

- ▶ IS-version (only for 4 ... 20mA / 2-wire):
Ex ia = intrinsically safe for gases and dusts
- ▶ SIL 2 application according to IEC 61508 / IEC 61511
- ▶ customer specific versions

The screw-in transmitter LMK 331 has been especially designed for level and process measurement and is suitable for pressure measurement of liquids, oils and gases. Usage in more viscous or polluted media is possible because of the semi-flush pressure sensor.

For the usage in aggressive media we recommend the version with PVDF pressure port. Additional features like e.g. an intrinsically safe version or a functionally safe version (SIL 2) complete the range of possibilities.

Preferred areas of use are

-  Plant and machine engineering
-  Energy industry
-  Environmental engineering (water – sewage – recycling)
-  Medical technology
